Mediamplify is the cloud-based distribution platform
for Cable TV, Mobile and Web

Merging web, mobile, and cable tv

What is Mediamply?

AMPLIFY YOUR REACH

AMPLIFY YOUR REVENUES

AMPLIFY YOUR COVERAGE

SIMPLIFY YOUR SOLUTION

We are a cloud-based “Platform as a Service” (PaaS) that merges the worlds of Cable TV, web, and mobile into one stop distribution system for entertainment, video, music and live TV

HIGHLY-CUSTOMIZABLE VIDEO STREAMS

- Any MPEG2 or MPEG4 Formats for audio/video
- Customize user interface and inject advertisement as desired
- On-demand and continuous video channels

Paywall and Web Integration

- Collect payments for video and audio subscriptions
- Easy integration with Cable Operator's billing systems
- PayPal, Authorize.NET, and others

Mobile and IPTV Integration

- Mobile Applications
- Internet Television and IPTV Support
- Smart TVs

THE MEDIAMPLIFY PLATFORM REPLACES THE SATELLITE

Currently the traditional method available for broadcasting media content through Cable or TV (i.e. Satellite music station/channel) requires the need to obtain satellite space from the cable or satellite operator, which typically involves large cash outlays and lengthy contract commitments.

However Mediamply's patented technology eliminates the need to obtain satellite space in broadcasting new media. Mediamply's technology is able to deliver the same quality content as a satellite does at the fraction of a price.

Components

- Mediaplug Hardware Encoder
- Mediaplug Software Download
- Scalable cloud-based platform
